DETERGENT

100%

Kitchens

- Counters
- Exterior of ovens
- Interior of ovens
- Taps
- Sinks
- Extractor fan and its filters
- Backsplash
- Kitchen floors
- Walls
- Grease trap *

Bathrooms

- Toilets
- Ceramic Tiles
- Basins
- Showers

General cleaning

- Floors and tiles
- Carpets / stains
- Greasy stains
- Wine stains
- Soap stains
- Mould stains
- Outside terraces
- Outside furniture
- Restaurant tables
- Bar

How to use:

Catho-Lyte 100% DETERGENT can be used to clean and degrease any surface.

For general cleaning: Spray Catho-Lyte 100% DETERGENT onto surface and wipe with a clean cloth. No rinse required.

For floors: Use Catho-Lyte 100% DETERGENT to clean and degrease floors and tiles. To achieve shine, follow with a 20% dilution of Catho-Lyte in clean water.

For stain removal: Spray area liberally with Catho-Lyte 100% DETERGENT and let soak for 5-10 minutes and then proceed with blotting with a clean, dry towel/cloth until stain is removed.

* **Grease trap:** Catho-Lyte 100% DETERGENT is a mild detergent. If Catho-Lyte is used regularly to clean the grease trap, it should keep it clean, degreased and unclogged. However, as stated, Catho-Lyte 100% DETERGENT is a MILD detergent and thus might not be able to sufficiently degrease the grease trap as health standards demand, and an alternative product should then be used.

SOAP MIXTURE

10%

Catho-Lyte SOAP MIXTURE can be used just as Catho-Lyte 100% DETERGENT. It has a fresh clean smell, whereas Catho-Lyte 100% DETERGENT has NO SMELL. For effective cleaning, mix 10% IQ Surfactant (Soap) with 90% Catho-Lyte.

How to use:

Catho-Lyte SOAP MIXTURE can be used to clean and degrease any surface.

For general cleaning: Spray Catho-Lyte SOAP MIXTURE onto surface and wipe with a clean cloth. No rinse required.

For floors: Use Catho-Lyte SOAP MIXTURE to clean and degrease floors and tiles. To achieve shine, follow with a 20% dilution of Catho-Lyte 100% DETERGANT in clean water.

For stain removal: Spray area liberally with Catho-Lyte SOAP MIXTURE and let soak for 5-10 minutes and then proceed with blotting with a clean, dry towel/cloth until stain is removed.

WINDOWS AND GLASS

5%

- Windows
- Mirrors
- Shower doors
- Glass surfaces
- Delicate items

How to use:

Catho-Lyte 5% WINDOWS AND GLASS can be used to clean, degrease and shine windows and glass.

For general cleaning: Spray Catho-Lyte 5% WINDOWS AND GLASS onto glass surface and wipe with a clean cloth. Polish with a microfiber cloth to achieve maximum shine.

STERILANT

100%

Deep Clean with Water Rinse

- Tables
- Counters
- Exterior of ovens/microwaves
- Interior of ovens/microwaves
- Kitchen surfaces and utensils
- Taps
- Sinks
- Extractor fan and its filters
- Kitchen floors
- Walls

Bathrooms

- Toilets

General cleaning

- Mould stains
- Outside terraces
- Outside furniture
- Restaurant tables
- Door knobs
- Surface disinfection
- Bar
- High touch areas

How to use:

Ano-Lyte 100% STERILANT can be used on surfaces to sterilize and kill all infectious causing microorganisms. It is stronger than Ano-Lyte 20% DISINFECTANT and should be used in high risk areas.

Kitchen: Ano-Lyte 100% STERILANT can be used to cold sterilize cutting knives and cooking utensils, as well as cutlery.

Bathroom: Ano-Lyte 100% STERILANT can be poured/sprayed into toilet bowl prior to scrubbing to disinfect after degreasing with Catho-Lyte 100% DETERGANT.

General cleaning: Ano-Lyte 100% STERILANT can be used to deep clean degreased surfaces and objects followed by a water rinse.

WARNING: Ano-Lyte 100% STERILANT is corrosive to metal. It should only be used on high quality steel and for no longer than 10 minutes. Always wipe and rinse with clean water after Ano-Lyte 100% STERILANT was used to prevent corrosion.

DISINFECTANT

20%

Kitchen

- Counters
- Kitchen Appliances
- Taps
- Extractor fan and its filters
- Kitchen floors
- Walls

Bathrooms

- Toilets
- Basins
- Showers

General cleaning

- Mould stains
- Outside terraces
- Outside furniture
- Restaurant tables
- Door knobs
- Surface disinfection
- Bar
- High touch areas like taps and light switches
- Tables
- Counters

How to use:

Ano-Lyte 20% DISINFECTANT can be used to disinfect everyday objects and surfaces without rinsing afterwards. Ideal to disinfect high touch areas like light switches, taps and door knobs.

Kitchen: Spray Ano-Lyte 20% DISINFECTANT on surfaces like counters and cutting boards and let air-dry. Repeat this after every use and wipe surfaces with a clean cloth, to prevent the spread of food-borne illnesses or cross-contamination. This will ensure that the kitchen is always a disinfected area and safe for food preparation.

Bathroom: Spray onto the exterior of toilets, degreased basins and showers. Wipe with a clean cloth. No rinsing required.

General cleaning: Spray onto degreased surface and wipe with a clean cloth. No rinsing required.
